

EDUCATION

Saint Xavier University, Chicago, IL
Bachelor of Science in Computer Science

Grad: May 2026
Overall GPA: 3.7

SKILLS

- Microsoft 365 (Excel, etc.)
 - Java, JavaScript, HTML
 - Data Entry
 - ER Diagram
 - Tableau, Adobe
 - MySQL, RStudio
 - Github, [Node.js](#)
 - SCRUM, Chen Notation
-

PROJECTS**Jan. 2026 - Present****LOOT | Money Manager App**

- LOOT is a money manager web application that helps make subscribers managing their finances easy. Technologies utilized include MySQL, HTML, JavaScript, and frameworks React and [Node.js](#).
- Created active back-end routes to the database utilizing JS and HTML which retrieved data from the database by pulling from schemas using curated MySQL queries.
- Worked on the backend, frontend, and database to design budgeting and external accounts features that provided users with simple access to their fixed expenses and multiple external accounts.
- Collaborated and communicated with team members through applications such as Discord, Github, and Trello to track our weekly progress and notify significant changes and requests regarding LOOT.
- Implemented Agile frameworks such as SCRUM and vertical slicing to allocate responsibilities and accountability for each team member.

Big5 | MySQL Database**Sept. 2025 - Dec. 2025**

- Big5 is a structural database that traces all films nominated at the Academy Awards for their 5 above the line categories including Best Picture, Director, Actor, Actress, Screenplay (Original or Adapted).
 - Applied Chen notation to design ER diagrams and relational schemas that were later converted into MySQL tables for the database.
 - Developed a database with MySQL to store data information about the films and people represented in the field pulling from the Academy of Motion Picture Arts and Sciences official website.
 - Applied my knowledge of conditions and JOINS in MySQL to generate and apply queries to find and export data in the database to help insert data and avoid repetition.
 - Used Tableau to outline and visualize trends and findings of the database such as the most nominated films in the database, the number of occurrences of a person in a category, etc.
-

RELEVANT EXPERIENCE**COVID-19 Tester/Data Associate****Jan. 2022- Jan. 2023**

TRILAB | Chicago, IL

- While a part of the testing team I also managed patient inventory and confidential information.
- Implemented clear and centralized data security processes to communicate with team and clients of patient safety and utilizing documents to find/export patient information.
- Managed data and accurately transferred patient information into excel.

JA Leadership**Spring 2021**

Junior Achievement | Chicago, IL

- Collaborated with a partner to teach a kindergarten class at Shields Elementary School.
 - Created lesson plans to educate the students in reading comprehension and math in both Spanish and English.
 - Used computer-based programs to teach students math while expanding their knowledge on computers.
-

LANGUAGES

English and Spanish
